

## Sunshine as a Natural Resource providing:

Light:

How can we use our hours of Daytime Light to greater advantage?  
Have we really exhausted all possible uses of light?

Warmth:

Can't we find less expensive ways to use the warmth of the sun to heat our home - so as to have more expendable income to improve our economic conditions.

Energy by using new voltaic cell technology:

We must use latest technologies to develop more, cheaper, energy sources for direct uses of people (cut out middle)

Bleaching capability:

Is there something we can develop to utilize the bleaching capability of the sun.

Bleeding capability

Endothelial cells are not a cell

Myocytes:

Light:

Myocytes are a type of smooth muscle.
